Course Content.

Note: Times listed reflect estimated time to complete each module with lectures and additional materials (Plan for about 80 hrs.)

01 Concussion Neurology, Epidemiology, Prevention & the Berlin Consensus | 3 hrs

An update on the international concussion consensus statement; prevalence across various sports and industries; prevention strategies and a review of pertinent neurology.

02 Pathophysiology of Concussion | 3 hrs

Current evidence about what happens inside the brain during a concussion from a metabolic, circulatory, and neurophysiological standpoint. Also covers Second Impact Syndrome.

03 Acute Neuro-Endocrine Aspects of Concussion & Sleep Dysregulation | 3.5 hrs

How concussion injuries disrupt the Gut-Brain Axis as well as the Hypothalamic-Pituitary-Adrenal System to create metabolic, inflammatory, hormonal, and sleep dysregulation.

04 Biomechanics of Concussion, Subconcussive Impacts, & the Cervical Spine | 3 hrs

How much force does it take to cause a concussion? What is the evidence for subconcussive impacts? What is the evidence for concussion prevention and strengthening programs? Wearable technologies? Sensors? Multiple Impact Exposure? We cover it all!

05 The Most Comprehensive Baseline Testing Protocol | 4 hrs

Rationale and support for comprehensive baseline testing as well as evidence behind each test in the protocol and how to perform and interpret each test.

06 Neurocognitive Test Administration, Interpretation, & Evidence | 2 hrs

Background information on the ImPACT neurocognitive test. How to administer this test in different scenarios and also how to interpret the results (Administration & Interpretation). Evidence and limitations.

07 Assessment of Acute Concussion | 8 hrs

A systematic and evidence-based approach on the assessment, diagnosis, and initial management of an acute concussion patient from the sidelines to the clinic.

08 Management of Acute Concussion | 4 hrs

How to properly return your patients back to school, work, sports, driving and everyday life.

09 Pathophysiology of Post-Concussion Syndrome (PCS) | 8 hrs

Why do some patients recover in a week, while some take months? Reviewing the current state of evidence in each of the main theories behind the emergence of PCS.

10 Post-Concussion Syndrome Treatment | 15 hrs

In-depth examination of the procedures of physical capacity, visual and vestibular dysfunction, and cervical spine function – the cornerstone of PCS rehabilitation and treatment strategies. This module covers how to assess, properly categorize and treat/rehab patients depending on their examination findings. Complete with evidence-based treatment algorithms for complex cases and demonstration of specific rehab techniques.

11 Chronic Traumatic Encephalopathy (CTE) | 3 hrs

CTE is thought to be the long-term brain damage caused by concussion and exposure to head trauma. But, how much do we really know? What evidence exists?

12 Impacting Your Community & Your Practice | 1 hr

Maximizing your impact with your new concussion program!

Course Instructors.

All instructors are also Complete Concussions Academy
Faculty Members available for ongoing support!

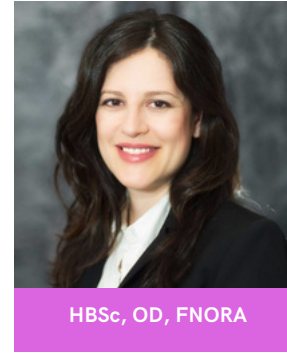

BA, DC, FRCCSS(C)

Cameron Marshall.

Sports-Specialist Chiropractor

- @Concussion_Doc
- Published Concussion Researcher
- Founder & President, Complete Concussion Management
- Founder, Concussion Fix Program
- Host - Ask Concussion Doc Podcast

HBSc, OD, FNORA

Shirley Blanc.

Neuro-Optometrist

- Fellow & Advisory Board Member - Neuro-Optometric Rehabilitation Association (NORA)
- Medical Advisory Board, Complete Concussion Management
- Consultant for numerous professional and professional sports clubs

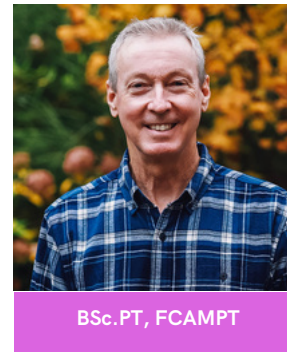

ND

Paul Hrkal.

Naturopathic Doctor

- @DrPaulHrkal
- Co-Founder, Concussion Fix Program
- Past Medical Director, AOR
- Medical Advisory Board, Complete Concussion Management
- Specializes in evidence-based nutritional, biological, and supplemental interventions to address underlying metabolic, endocrine, and immunological dysfunctions in brain injury

BSc.PT, FCAMPT

Bernard Tonks.

Vestibular Physical Therapist

- Founder & Director, Balance & Dizziness Rehab Clinic
- Founder & Director, Vestibular-Rehab.com
- Has taught thousands of courses on vestibular rehabilitation and concussion

BSc, MD, FRCP, CSCN Dip

Adit Margaliot.

Medical Doctor - Neurologist

- Fellowships in Neuromuscular Disorders & EMG
- Functional Medicine Practitioner
- Sleep Medicine Specialist
