

COMPLETE
CONCUSSIONS

Concussion Management for Physicians & Specialists.

Overview

As the name implies, this course is an evidence-based, highly referenced concussion training program for physicians and other healthcare providers that could be considered specialists (Neurologists, Neuro-optometrists, Neuropsychologists, Functional Medicine etc.) and/or adjunct care providers other than PT, Chiro, AT, OT, & SLP. Upon completion of this course, you will have the opportunity to be listed on CompleteConcussions.com as a provider and linked in with our network of 500+ clinics to send and receive referrals as we would love to have more well-trained physicians and specialists in the Concussion Management network.

In this course, you will learn the key areas of current evidence-based principles for managing any concussion case, regardless of mechanism. Total course length is 11 hours.

Course Content.

Note: Times listed reflect estimated time to complete each module with lectures and additional materials (Plan for about 12 hrs.)

01 Introduction, Epidemiology, and Concussion Prevention | 2 hrs

An update on the international concussion consensus statement; prevalence across various sports and industries; prevention strategies and a review of pertinent neurology.

02 Pathophysiology of Concussion | 2 hrs

Current evidence about what happens inside the brain during a concussion from a metabolic, circulatory, and neurophysiological standpoint. Also covers Second Impact Syndrome.

03 Baseline Testing Protocol & Neurocognitive Test Administration & Interpretation | 2 hrs

Evidence on baseline testing as well as administration and interpretation of neurocognitive testing.

04 Acute Concussion Assessment & Management | 2 hrs

Acute assessment, ruling out Red-Flags, better diagnosis. This module touches on all the latest evidence with respect to assessing and managing acute concussion injuries through return to learn, work, and play.

05 Persistent Concussion Symptoms (PCS) & Chronic Traumatic Encephalopathy (CTE) | 3 hrs

These are the most challenging and complex cases in the concussion field. This module covers all the latest information regarding these complicated clinical pictures and also covers the latest evidence on CTE and long-term neurodegenerative conditions attributed to concussion and head injury.
